Mixtec Introduction

Dear Sir,

Please allow me to introduce Mixtec Solutions, the company I proudly represent. Mixtec Solutions is part of an international group of mixing companies with manufacturing facilities in London, Johannesburg, Salt Lake City, Santiago, Singapore, New Zealand and Australia. The global group can trace its roots back to its original inception in the UK in 1902 with the company Kestner Engineering.

Over the years Mixtec Solutions has been on the forefront of mechanical fluid agitation which has been achieved through constant research, development and testing, both in the field and in our fluid mixing laboratories. We offer a full range of fluid mixing equipment, which includes top entry, side entry, and bottom entry units as well as in line static mixers and jet mixers.

To develop the company's presence in the Kazakhstan market we have appointed Uniflo Kazakhstan LLP as our local marketing agent to contact prospective customers and call on them. We request that you assist Uniflo to identify your mixer needs so we can provide our products and services.

Your assistance in this matter will be greatly appreciated and we look forward to potentially doing business together in the future. Please see attached our company brochures and references relating to some of our previous projects which we trust will be of interest.

Yours faithfully

Neil Baguley

Uniflo Agency Notice

Mixtec Solutions hereby confirms that we have appointed Uniflo Kazakhstan LLP as the Mixtec Agent for the Kazakhstan and surrounding areas.

Mixtec is a leading global supplier of mixing and agitation technologies and working with Uniflo we aim to grow our presence in the Kazakhstan market.

We look forward to assisting you with your mixer enquiries in the future and we trust that should you require any further technical or commercial information you will not hesitate to contact Uniflo.

Yours faithfully
